

**Dr. Javier Carrillo (Mexico)**

*“The emergence of a global value system – a critical mass of individuals realizing the potential of knowledge to leverage a universal process of sustainable development. The knowledge management movement has a potential for leveraging a global transformation based on a value balance for mankind as a whole.”*

Scientist and consultant devoted to Knowledge Systems and Knowledge Management since 1980. He is professor of KM at the *Monterrey Institute of Technology*, where he founded the *Center for Knowledge Systems*<sup>1</sup> (CKS) in 1992 – notably the first in the world. His main interests are knowledge-based business creation and development, knowledge systems audit and the contribution of knowledge systems to the emergence of a global consciousness. He has developed a KM Model (*Knowledge-based Value Systems*), which has been applied in over 60 consultancy projects in several countries. Based on this experience and related R&D, he and his colleagues at CKS developed in 1998 the ITESM graduate KM curriculum program, one the most comprehensive KM educational offerings available. He holds a Ph.D. in Psychology of Science and Technology from *King’s College, London*, an M.Sc. in Logic and Scientific Method from the *London School of Economics* and an M.Sc. in Experimental Analysis of Behavior from *UNAM, Mexico*.

He serves on the Advisory/Editorial Boards of several international KM organizations, such as *The Knowledge Management Consortium International (USA)*, *The Journal of Knowledge Management (UK)*, *Knowledge and Innovation: The KMCI Journal (US)*, *The Research Center on Knowledge Societies (Madrid)*, and is a member of several KM networks such as *The Entovation 100 (USA)*, *The Sociedades del Conocimiento Community (Basque Country)*, *The EVOLVE Project (European Community)*, *The CORGA Network (Venezuela)*, and the *MIK-KM Program (Spain)*. He is currently Vice President of the *KMCI-Institute* ([www.kmci.org](http://www.kmci.org)). Based on the CKS, he has built a KM network throughout the Americas, whose influence has been acknowledged by KM directories, networks and studies. He is a regular presenter at international conferences. He is the founder and editor of *The KMetaSite*,<sup>2</sup> a free web-based reference service that includes 4 domains: (1) an Introductory section with definitions, glossary, related magazines and on-line articles/references; (2) an R&D section with a Meta Model, philosophic and scientific foundations, organizational KM processes and related R&D issues; (3) a Business section for specialized periodicals, standards, commercial yellow pages and a KM toolkit; and (4) a Reference section for white papers, a directory of Who’s Who in KM, electronic bulletins and KM forums.

Dr. Carrillo can be credited with building the foundation under KM as a field of study and evolving a community of practice therefore. In his articles, such as “Managing Knowledge-based Value Systems,”<sup>3</sup> he outlines the origins of value-dynamics in knowledge-based economies. Through his work with the CKS, he has expanded the network of alliances building a ‘community of value.’ He has even expanded his curriculum – complete with a video series of knowledge leaders– through Monterrey Tec’s on-site broadcasting studio delivering to some 200 sites throughout Latin America + digital on-line Internet delivery worldwide.
